Eazi Chair

The Eazi Chair standard provides the comfort and reliability of a powerchair and electric wheelchair in one unique package. A total travel distance of up to 24 miles is made possible by the 2 lithium batteries which slide easily into the support bars on the side of the frame. Another feature of the Eazi Chair standard is that it can be folded down to just 97 cm height x 40 cm depth x 60 cm length. Pull the lever at the back and the eazi chair standard folds in under 10 seconds and is ready to store in any car boot or small storage space. The two 180W motors will help you navigate an incline of up to 12 degrees, while the anti-tip wheels provide that extra stability. The joystick control can be fitted to either side of the powerchair and has 360 degrees turning capability which can be controlled using only a thumb or finger. The Eazi Chair standard has a tight turning radius of 800mm [31 inches], making it perfect to use at the shops or on days out with family and friends. It would be an excellent choice for those who are looking for a portable powerchair which offers unrivalled manoeuvrability and comfort.
