Mobility Scooters

Reference no. ST021

Supascoota Spartan

The Spartan offers portability for the larger passenger. The dual motor drive system gives impressive performance and has a super light frame design with seat suspension. 2 batteries are provided as standard however, the second battery will need to be removed until needed.

Please be mindful that gangways and air bridges can vary in the degree of gradient due to the tides, some products are not designed to cope with acute slopes.

Due to the design of the frame, this scooter may be less suitable for some thresholds on certain ships.

– please ask a member of staff for more details.
