

Power Chairs

Reference no. PC007

Cruiser 7 - Fusion Power chair

The pride fusion power chair is a rear wheel drive chair with a power tilt and manual recline.

It is highly manoeuvrable in tight spaces making it a suitable choice for a cruise ship. This chair also features manual elevating leg rests and a swing away joystick for ease of transfer. On board are 2x 45Ah AGM dry cell batteries which can give a max speed of 6.4kmh(4mph) and a max range of 25km(15miles), although the range and speed of the scooter may vary depending on the weight of the user, terrain type, outside temperature and battery charge.

We advise that you plan your route to avoid adverse terrain, inclines, kerbs and steps if possible; if this is unavoidable we do not advise an incline above 5° and a kerb / step above 4cm(1.5").

Specifications

| | |
|---------------------------|----------------|
| Ground Clearance: | 11cm / 4.3" |
| Length: | 89cm / 35.1" |
