Moving & Handling

Reference no. MH015A

Birdie 180 Hoist

This hoist has an electrically operated arm controlled by a remote and manual push levers for adjusting the leg width.

It is the client's responsibility to provide their own loop attachment sling

Please do not store or use the hoist in the bathroom or on the balcony.

Be aware that it is not recommended that the wheel brakes are applied when hoisting and that moving across the cabin is limited due to resistance with the carpets on board.

Specifications
